ASEAN  
CYBER  
DEFENSE  
CONFERENCE

# ABOUT THE CYDEF CONFERENCE, KUALA LUMPUR

CYDEF is a 2-day working conference that brings together cyber security practitioners, academicians, and other related information technology industry professionals to share their experiences and insights to a non-technical, senior level executive audience.

The conference is tailored to assist senior executives who leads their organization's digital transformation initiative and business continuity programs.

Topics presented mainly focuses on identifying security "gaps" that puts an organization at high risk when performing operations over the internet, globally.

Join this working conference to discover what organizations are doing to combat the threats in cyberspace.

”

*There is no such thing as a secured system. It's either your organization has been hacked or is going to be hacked..*

*~Former FBI Director Robert Muller*

IACSP Singapore

## ABOUT IACSP

The International Association of Counterterrorism & Security Professionals (IACSP) was founded in 1992 to meet the security challenges in the wake of the globalization era of the 21 century. IACSP believes that the society at large must be made aware of the potential threats of terrorism and advocates that a better informed society will result in a freer one.

The IACSP of South East Asia Region Center of Studies collaborates with researchers, academicians and practitioners on the ground to provide solutions and counter measures from the acts of terrorism and extreme violence in the region.

The challenges of security lies not only with the government alone; as threats inherent in our changing and borderless world must be confronted by all segments of society.
